Questions People Often Ask About Alfa PXP

ANSWERS GIVEN BELOW BY OUR RESIDENT HEALTH EXPERT,
DR. DOUG GABBERT.

<http://www.pxpteam.com/ellen>

1. **Question: What is Alfa PXP? Answer: A bio-ready whole food powder. Made from specific grains of rice with a pinch, yet powerful amount of Pacific Ocean blue-green algae called Spirulina. By combining these two “super foods,” a synergy is created offering you highly-absorbable, second-generation amino acids, numerous antioxidants, plant based vitamins and minerals and energy-forming**

polysaccharides peptides (alphaglycans) that target premature aging and build lasting mental and physical vitality and health.

- 2. Question: What are alphaglycans? Answer: Micron size amino acids bonded to complex sugars which when combined together make tiny nutrient complexes that are easily absorbed by your cells that recognize them as bioready superfuel—nutrients you just can’t get in a modern diet. This super-fuel is pumped directly into cellular mitochondria—the “power plant” of your cells—responsible for cells-abilities to repair and strengthen themselves and which many researches tag as “the fountain of youth within every cell.”**
- 3. Question: What is bioready Nutrients© (BRNs)? Answer: Enzacta prides itself on having BioReady Nutrients (BRNs) in all their supplements. BRNs are nutritional complexes extracted, concentrated, and naturally-enhances for better bioavailability. Through patent pending and proprietary technology, Enzacta is formulating high quality products that contain key ingredients (BRNs) that are known for their health-promoting properties. With Alfa PXP, Enzacta administers the latest in cutting-edge, digitally controlled manufacturing technology when extracting the essential nutrients from ordinary rice. This space-age technology captures the vital nutrients in each grain of rice, extracting them safely to create a bioavailable powder easily recognized and quickly absorbed by your cells. The 3-Step process for creating Alfa PXP includes: (1) Rushing the ordinary rice grains from the field to the FDA-approved factory and placing them in specifically designed extraction units. (2) Through a bioactivation processed called “alphaglycanization,” the ordinary rice grains are then converted into PXP’s using nanonizing and mechanical**

hydrolyzation producing functional characteristics that your cells and DNA recognizes. (3) Finally, the PXP's are blended in a perfectly balanced ration with Spirulina.

4. **Question: Why is the rice in Alfa PXP so unique? Answer: Thailand has won several global awards for the quality of the rice. The highest quality rice comes from the Siam valley specially selected by Enzacta's top rice DNA experts that constantly seek out the most potent rice strains there. They must verify that they are grown in soils that have never been polluted with pesticides or chemical fertilizers. Next, each rice field is monitored carefully to ensure that the rice is harvested at exactly the right time for maximal nutritional content. It takes approximately 100 pounds of rice to make one pound of product.**
5. **Question: Alfa PXP is a potent antioxidant. Why is that so important? Answer: Antioxidants neutralize free radicals—dangerous particles that rip through your cells and cellular DNA that are attributed to causing cell damage, mutation and even death. It is this damage that is linked to Syndrome X and most every type of cell mutation, cardiovascular challenges, neurological dysfunction, blood sugar imbalances and degenerative diseases.**
6. **Question: What is “Syndrome X?” Answer: Syndrome X is a nutritional disease caused by eating the wrong foods. It generates massive numbers of cell-damaging free radicals. Syndrome X can remain hidden for years, masquerading as symptoms of other conditions including fatigue, mood swings, achiness and poor concentration and memory. Known as the “modern-day” plague, it is estimated that up to 50 percent of the American population has already fallen victim to Syndrome X.**

7. **Question: What is the best way to take Alfa PXP? Answer: Take 1 scoop daily for maintenance or 2-3 scoops daily for health challenges. It can be taken with or without food, best when mixed in warm to hot water or beverages. Infants and small children can take half the adult recommendations.**
8. **Question: Can I take Alfa PXP with other medications? Answer: Although Alfa PXP is a very safe as a whole food, it is always recommended that you check with your doctor first when taking any medication with Alfa PXP.**
9. **Question: How soon can you feel the effects of Alfa PXP working in the body? Answer: It is possible to feel immediate effects, but most Alfa PXP users report positive results in four weeks.**
10. **Question: What do many doctors recommend as the best three things you can do to improve your health? Answer: (1) Eat a diet rich in whole fresh foods like vegetables, fruits, whole grains and lean meats, (2) Get 30 minutes of moderate activity a day (3) Use Alfa PXP daily for a super-boost of powerful antioxidant nutrition.**
