

I take the AIM products because I prefer juiced foods for the feeding of my cells. Juicing foods with a juicer is the way to go, IF, you are ambitious enough and have time enough to do that every day. I have found it to be less expensive to drink the juice powder of the AIM Barley (xtra has fruit in it too), carrots and beets. I flood my cells with the juice foods because the body does NOT have to work to digest it and my cells are flooded with life giving enzymes that transport the vitamins and minerals quickly to wherever there is need. God within me, His Divine Nature, is the master controller of all cellular functioning. I am very glad I have nothing to do with that complicated process.

God is my healer and I am His steward of His Temple. Cleaning and feeding God's temple is my responsibility and I reap the blessings of choosing Godly wisdom over worldly wisdom.

My testimony is that I walk in divine health, fear no cancer and I am always learning how to avoid the traps that will bring self-destruction. Satan is always coming up with some new chemical to put into our foods and he uses our lusts to cause us to eat things that will destroy cells. For example, we love sugar and lust for lots of sugary drinks and foods. So since we learned to be more careful about sugar, he came up with a chemical that says we can eat all the sweets we want and not gain weight. These nonfood chemicals are not food and thus they create a toxic environment that interferes with cellular communication, thus cellular health is compromised. New diseases seem to follow new chemicals added to our foods, but the correlation is ignored by those who profit. Is not the love of money the root of all evil?

The AIM Companies have a wonderful web site to educate anyone who desires to learn about the life giving power of enzymes and the nutrients found in these juice powders. You can visit the website using my ID # and pass word and order at whole sale prices.

ENZYMES

WHAT ARE ENZYMES? Enzymes are very important to understand. I believe enzymes are the most important things you can learn about nutrition. Enzymes are living proteins. NOTHING happens apart from an enzyme from digestive to metabolic. The key word about enzymes is the word LIVING. Sadly most foods lack the "LIVING" proteins because of processing, heat and age. However, there is hope in our fast pace life. I have found fast food juicing through the AIM products. AIM juiced foods are just as powerful as freshly juiced foods. The enzymes are activated when water is added and your cells rejoice because of the power of enzymes in the juice to promote a clean, alkaline, and well nourished cells.

The AIM products are LIVING foods that are overflowing with ENZYMES. The powder is

coats the enzymes so they do not die. When water is added it is just as fresh as if you just juiced the plant yourself. When water is added the enzymes are activated and made readily available. Eating dead foods forces the body to produce digestive enzymes that should have been in the food. Researchers believe that there is only a limited number of enzymes produced and when that number runs out we have no more life in our cells. Enzymes are required for every function in the body to include division of cells. Eating dead foods depletes the "limited account" of metabolic enzymes for cellular life and health. God made our foods to give us energy through LIVING enzymes.

We can choose to supplement our diet with enzymes through AIM products through juice powders. We also have digestive enzymes to take when we eat cooked foods. The AIM powdered Barley, carrots and beets are a great source of living foods for people like myself that have a fast paced life. AIM foods are healthy fast foods.

To provide enzymes for cooked foods I take 1 prepzyme with every meal.

WHY I DRINK THE AIM PRODUCTS

I have learned that juiced foods are the best and fastest way to provide my cells with mega amounts of nutrients. I do eat the whole food in small amounts. So why juice the food? Because whole foods are juiced by your body and only about 1/3 of the juice will be extracted. Plus my body has to work much harder to digest whole food versus juiced foods. Juicing provides my cells with cell building materials without using energy to digest. Digestion take more energy than we realize. Juicing provides the body with nutrients that are synergistically perfect molecule that God created for your cells. If I want to build my immune system to ward off infection and clean out toxins, I juice more. When my cells have to work harder, they need more nutrients to remain strong. The more stress you have in your life, the more nutrients you should give your cells. A marathon runner has a lot of stress, but he prepares for the stress. We have daily stress and we should prepare our body to handle the stress. To starve cells with non foods and expect cells to keep you strong is simple mindedness. Stress factors vs. lack of nutrition is an environment for cellular breakdown.

God is the Master Chemist and He synergistically formulated all of His creation. He is the Master controller of every cell in all of creation. Man has only a limited ability to understand God's creation and only in part. Man's imaginations apart from God's Wisdom is foolishness to God. How could I even expect man to even understand why God put all of the nutrients in a plant a certain way. I trust God's creative work and not the wisdom of men. I also trust God's diet plan in the Bible. It kept the Israelites healthy and it will keep anyone healthy who acts on their faith. I want the food in the same molecular structure as God created it! Man wants to take the molecules apart, separate the molecules from the food and remake "vitamins" for the cells. God's cells are whole and the food is best received in whole form. Man's ways are foolishness to God.

The AIM products are whole foods and the molecular structures remain unchanged. The enzymes are living and preserved naturally. I like the AIM products because they are organically grown in mineral rich soils. The time and expense it will take me to grow or find the high quality of foods would be much more than buying the AIM juice powders. AIM also has the juiced powder in

want the convenience of capsules.

GOD'S WORD SAYS OUR DAYS ARE NUMBERED

I believe that God has numbered our days and I am beginning to believe that number relates to the number of enzymes the body will produce in a life time. His Word says that in HIM we live, move and have our being. Nothing happens in our body without enzymes. We have only a number of LIVING enzymes that our body will produce in our life time according to nutritional research. Even the DNA has to have an enzyme leading the gene to its proper place during division.

Every metabolic function in our body requires enzymes and when the enzymes run out, I believe cells cannot function, divide or live. God did not intend for our foods to be dead processed foods which are free of all living enzymes. My theory is that if we are eating enzyme free foods we are using up the ability to produce metabolic enzymes. Enzyme free foods force the body to produce the enzymes that should have been with the food. Thus using up the "limited number" of enzymes that our body can produce in our life time. I also believe that yeast builds up because our foods lack enzymes. It is not just about good bacteria versus bad bacteria. We also have more bad bacteria when we eat dead foods. Dead foods are cooked foods and/or processed to the degree all enzymes are destroyed.

FOODS DO NOT HEAL - ONLY GOD'S WORD HEALS "I AM THE THE GOD THAT HEALS YOU"

Foods do not heal, foods merely give the cells natural chemicals that allow the cell to have life. God is the only source of healing and God is the only source of LIFE. If we give our cells food that God designed for them, His healing is quickly manifested. God's Word says that IN HIM we live, move and have our being.

An analogy to understand why good nutrition affects your health is to understand that even cuts on the outside will heal more slowly if a person is malnourished. A strong immune system results in faster healing and again, FOODS DO NOT HEAL, God's Word is the source of healing.

Another analogy is to understand that if you have a wound that is dirty on the outside the healing

cut can make the **WHOLE BODY** sick and die if not cleaned.

Cleaning the wound will promote an environment for healing. My theory about infections on the inside is much like the infections you see on the outside of the body. The toxins and filth on the inside will interfere with good cellular communication just as it will in a wound on the outside. Infection (itis) is a major health problem in our nation and every disease seems to be **INFECTED**. It is common sense to clean the cells on the inside, as well as the outside? It does not make sense to take more toxins that merely block the symptoms. Juicing helps the body cleanse the cells of cellular debris and it gives the digestive system a rest much like fasting does. Please read about **Miracle II** products for cleaning the body on the inside and out.

I know God will heal me when I get a cut or scratch. I also know it will not heal if it is dirty and I refuse to clean it. I also know if my wounds are slow to heal my immunity is low and I need to build myself up through good nutrition. Juicing is the fastest way I know to flood the cells with nutrients without causing my digestive system to work. When I am sick I need all of my energy directed toward healing, not digesting. I also believe God formulated the **Miracle II** products to deliver us from toxins that fill the air, water and food supply. God is the healer and my job is to provide His temple with cleanliness and living foods.
